

Experiment 8

Name: Maithili Sawant

Roll No: 33

Class: SE3

Aim: Building a Simple Counter App using React Hooks. Use React Hooks (useState, useEffect) to manage state and side effects.

Code:

 HTML

```
<!DOCTYPE html>
<html>
<head>
  <title>Counter App</title>
</head>
<body>
  <div id="root"></div>
</body>
</html>
```

```
import React from "react";
import ReactDOM from "react-dom/client";
import App from "./App";

const root = ReactDOM.createRoot(document.getElementById("root"));
root.render(<App />);
```

```
<> index.html  JS App.js  X  JS index.js
counter-app > src > JS App.js > [?] default
1  import React, { useState, useEffect } from "react";
2
3  function App() {
4    const [count, setCount] = useState(0);
5
6    // useEffect for side effect
7    useEffect(() => {
8      document.title = `Count: ${count}`;
9    }, [count]);
10
11   return (
12     <div style={{ textAlign: "center", marginTop: "50px" }}>
13       <h1>Counter App</h1>
14
15       <h2>{count}</h2>
16
17       <button onClick={() => setCount(count + 1)}>
18         Increment
19       </button>
20
21       <button
22         onClick={() => setCount(count - 1)}
23         style={{ marginLeft: "10px" }}
24       >
25         Decrement
26       </button>
27
28       <button
29         onClick={() => setCount(0)}
30         style={{ marginLeft: "10px" }}
31       >
32         Reset
33       </button>
34     </div>
35   );
36 }
37
38 export default App;
```

OUTPUT:
