

Assignment – 1 MDM

Q1.

Design a complete HTML5 webpage for a college event that includes the following:

- **A main heading and subheading**
- **A paragraph describing the event**
- **A list of events**
- **An image**
- **A table showing event schedule**
- **A registration form**

Use appropriate HTML5 elements.

Q2.

Explain the use of inline, embedded, and external CSS by applying styles to a webpage.

Demonstrate cascading, inheritance, background, border, color, and shadow properties with suitable code.

Q3.

Describe how Git and GitHub are used for version control and collaboration.

Explain the complete workflow from pushing source code to creating a pull request.
